Using Zehnder Janda radiators, you can easily create the bathroom of your dreams – pleasing to the eye, functional and cozy. The elegantly curved horizontal tubes emit not only warmth but also lightness. The lightness effect is inherent to all basic models, which may be modified depending upon the required size or colour. Palpable comfort level is achieved by virtue of design: towels or bath robes can be easily placed on the horizontal tubes. Zehnder Janda radiators are comprised of horizontal and D-profiled vertical tubes.

The strong and imperceptible joining of tubes is accomplished by laser welding. The radiators are supplied ready for installation, complete with original brackets for concealed mounting. Zehnder Janda radiators may be water-filled or electric.
