

zehnder radiavector

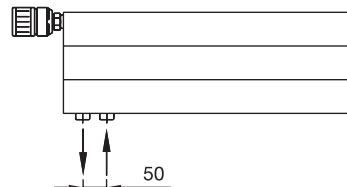

Zehnder Radiavector convectors are distinguished by their high efficiency and compact size. They may be installed in front of windows, in a greenhouse, and in floor-mounted channels. Being only 70 to 280 mm high, they save a lot of space. Owing to their compact size, the convectors can be installed directly in front of glass facades. Welded-on feet and decorative grating fi-

nished in the same colour as the convector, complete its appearance. The ability to produce corner models of the convectors, including models with many angles, opens wide possibilities in design and utilization of indoor space.

Technical parameters

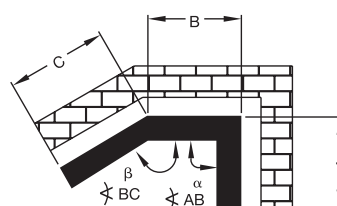

Installation length from 500 to 6000 mm
 Installation height from 70 to 280 mm
 Installation depth from 73 to 317 mm

Operating pressure

Standard max. 5 bar (test 6.5 bar)
 High pressure (Special order) max. 10 bar (test 13 bar)
 Operating temperature max. 120 °C

Special configurations:

- With various connection modes, including the Completto version with integral thermal valve
- Corner models and bench-like models
- Intermediate lengths and lengths in excess of standard sizes (up to 7000 mm)
- With reflective screen
- Zinc-plated finish
- Choice of colours from 700-colour palette of RAL and NCS S
